

Budget Tracking App

"Transform your finances with a glance: Welcome to next-level budgeting and expense tracking."

Problems

1. Difficulty in Managing Recurring Payments and Debt.

2. Lack of Real-Time Financial Insight.

3. Complexity in Splitting Expenses Between Multiple People.

4. Inefficient Budget Planning Due to Inadequate Expense Categorization.

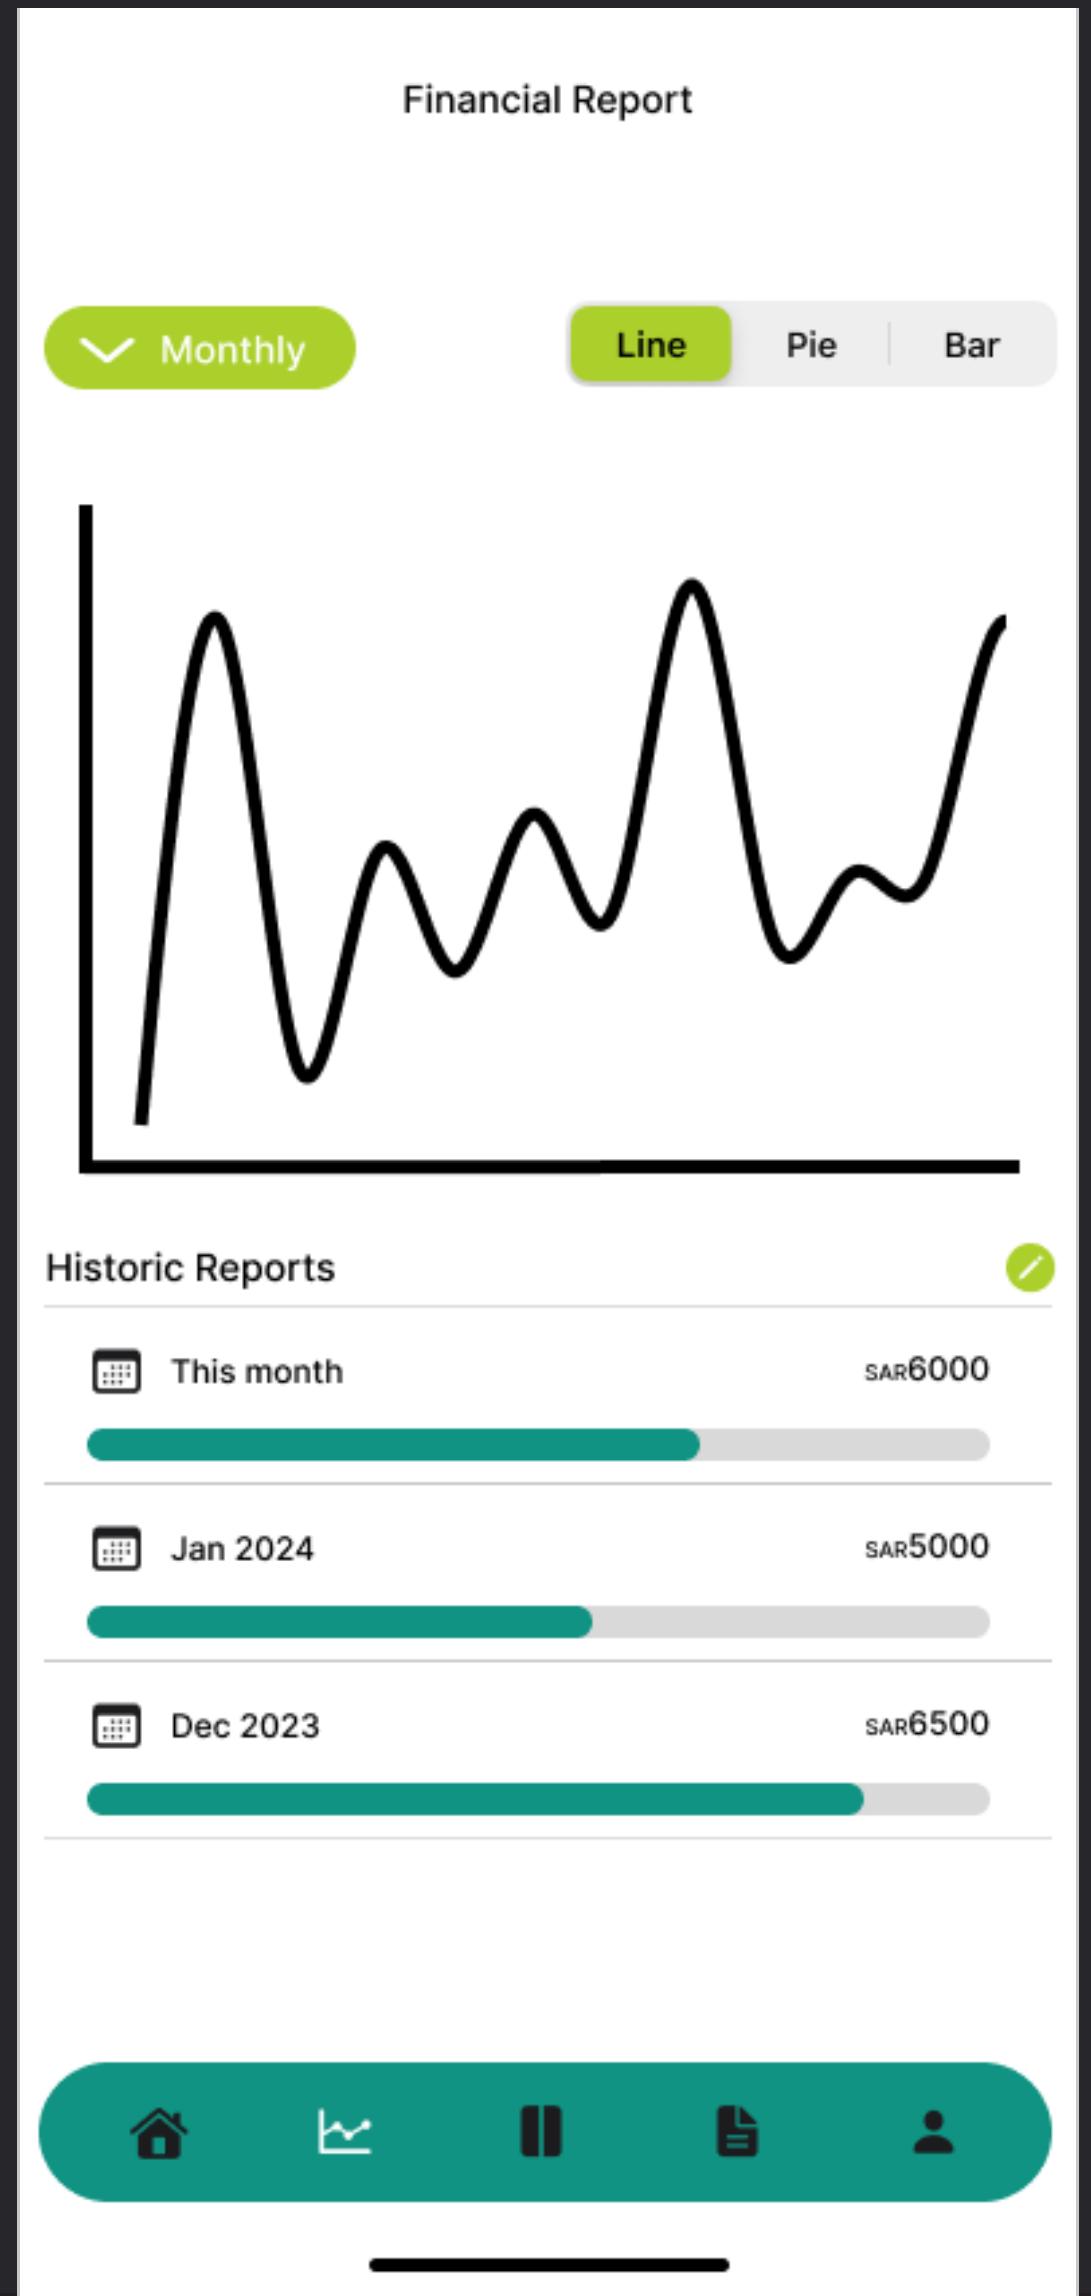

Solutions

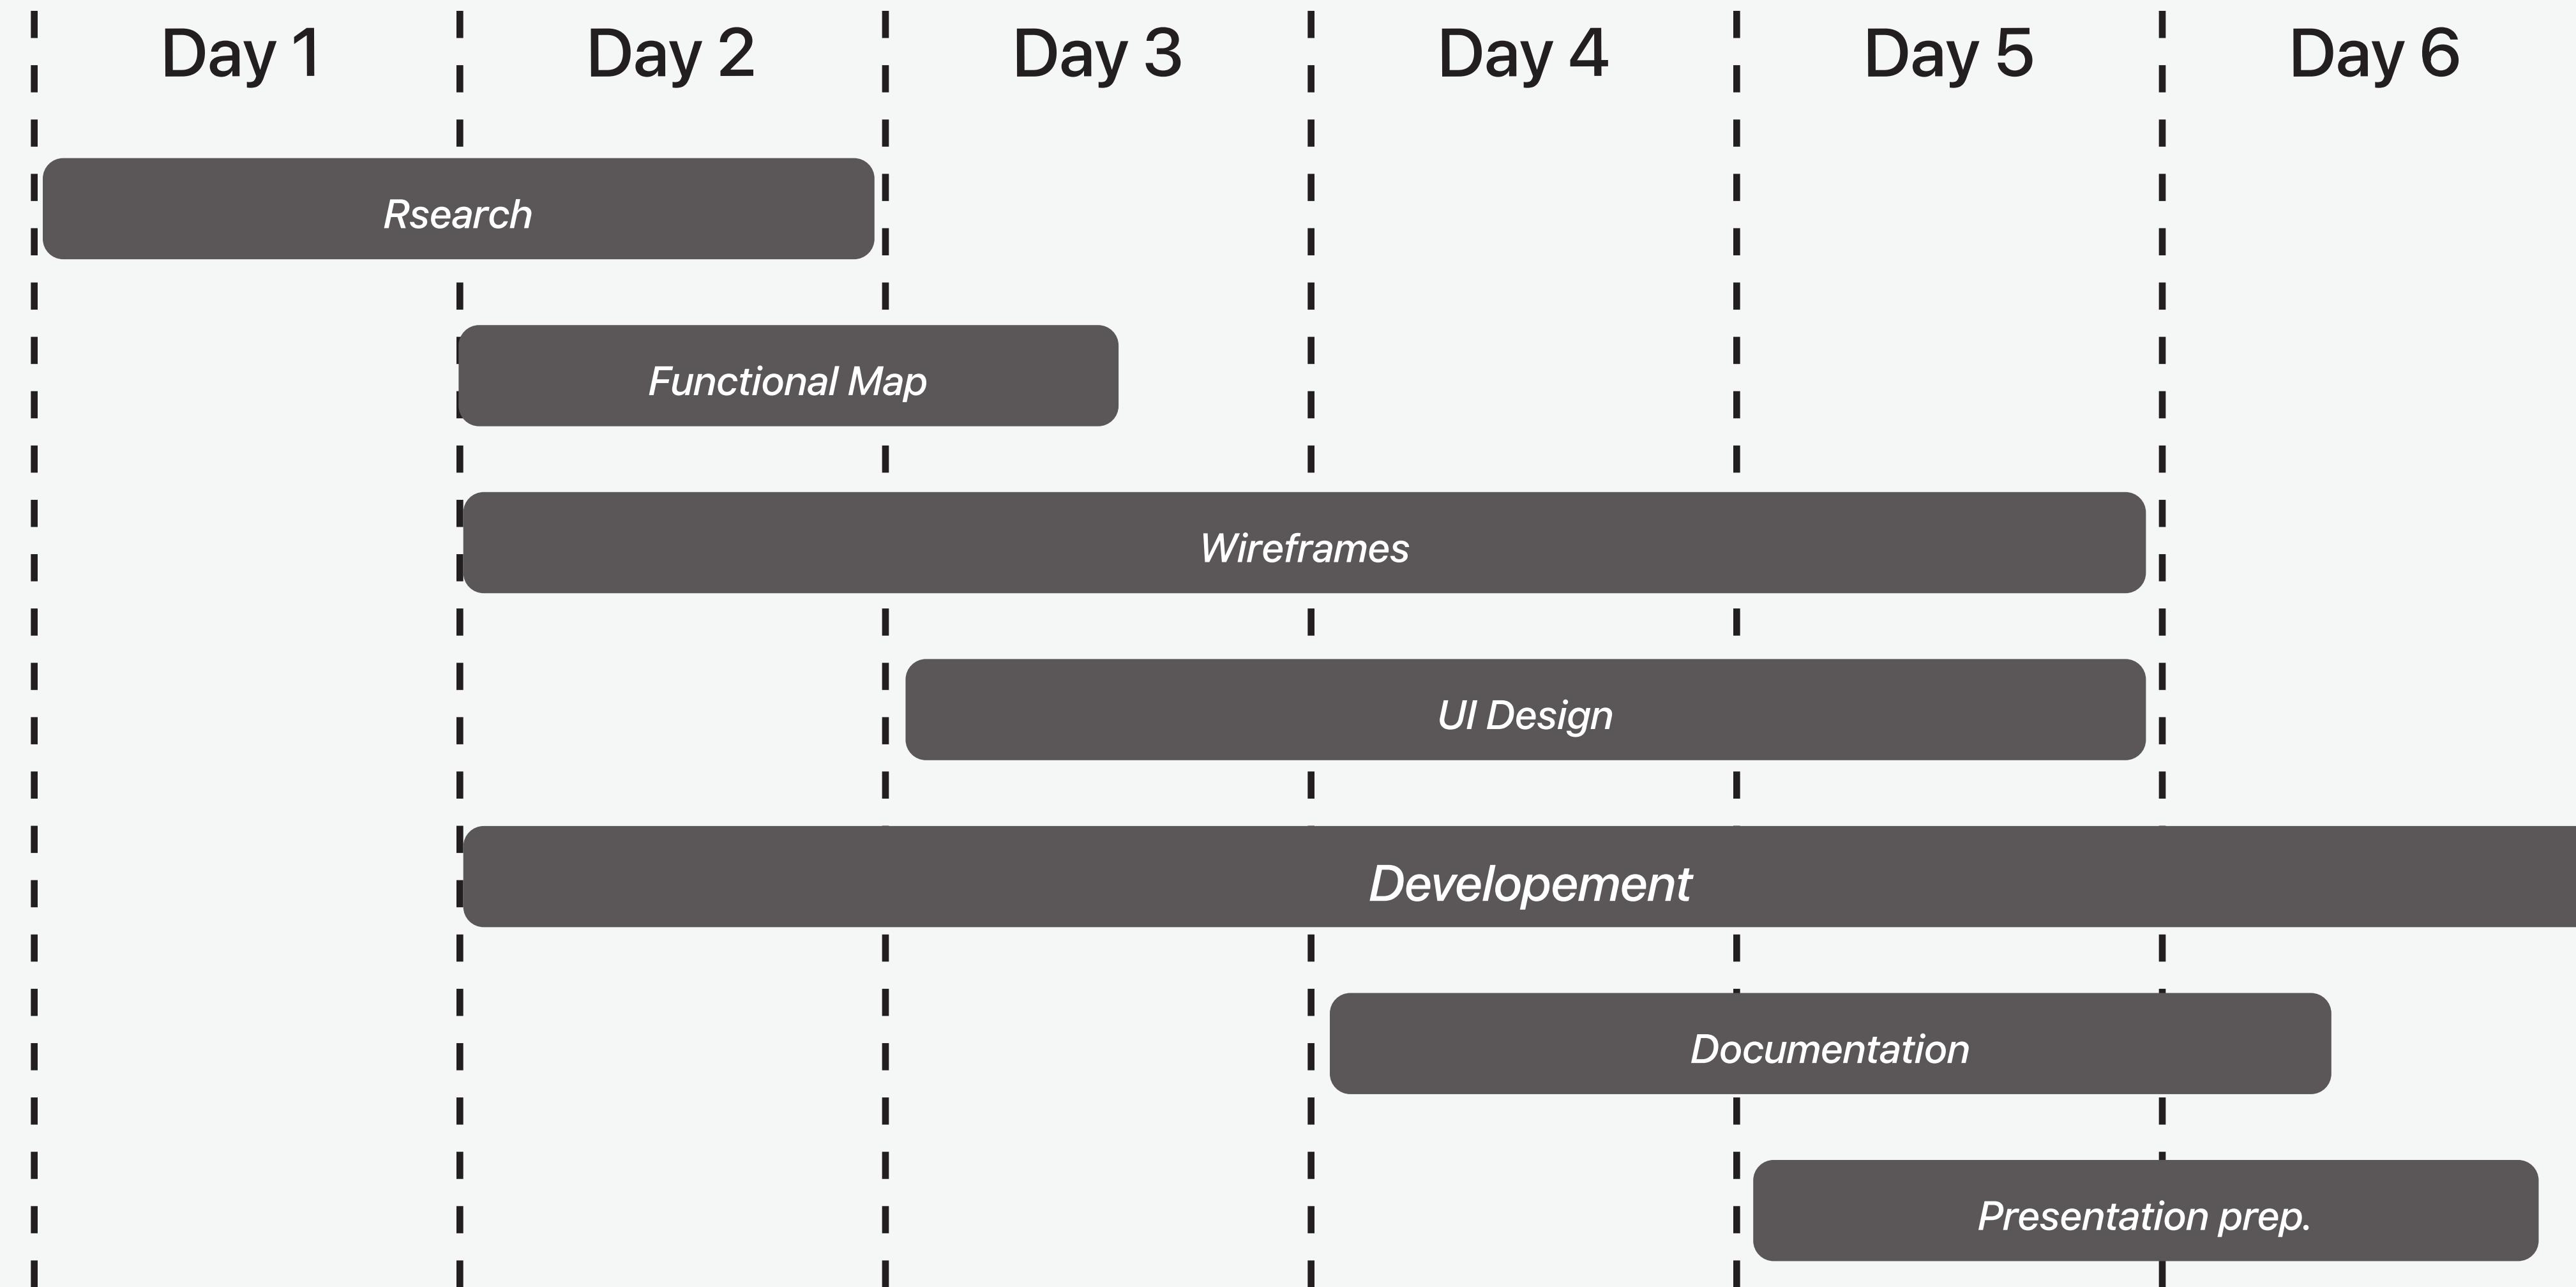

1. Automated tracking and reminders for managing recurring payments and debts effortlessly.

2. Real-time financial insights with customizable reports and visual dashboards.

3. Easy splitting of expenses, including uneven splits, and tracking who has paid, to simplify group financial management.

4. Optimize budget with detailed expense categorization and spending pattern tracking.

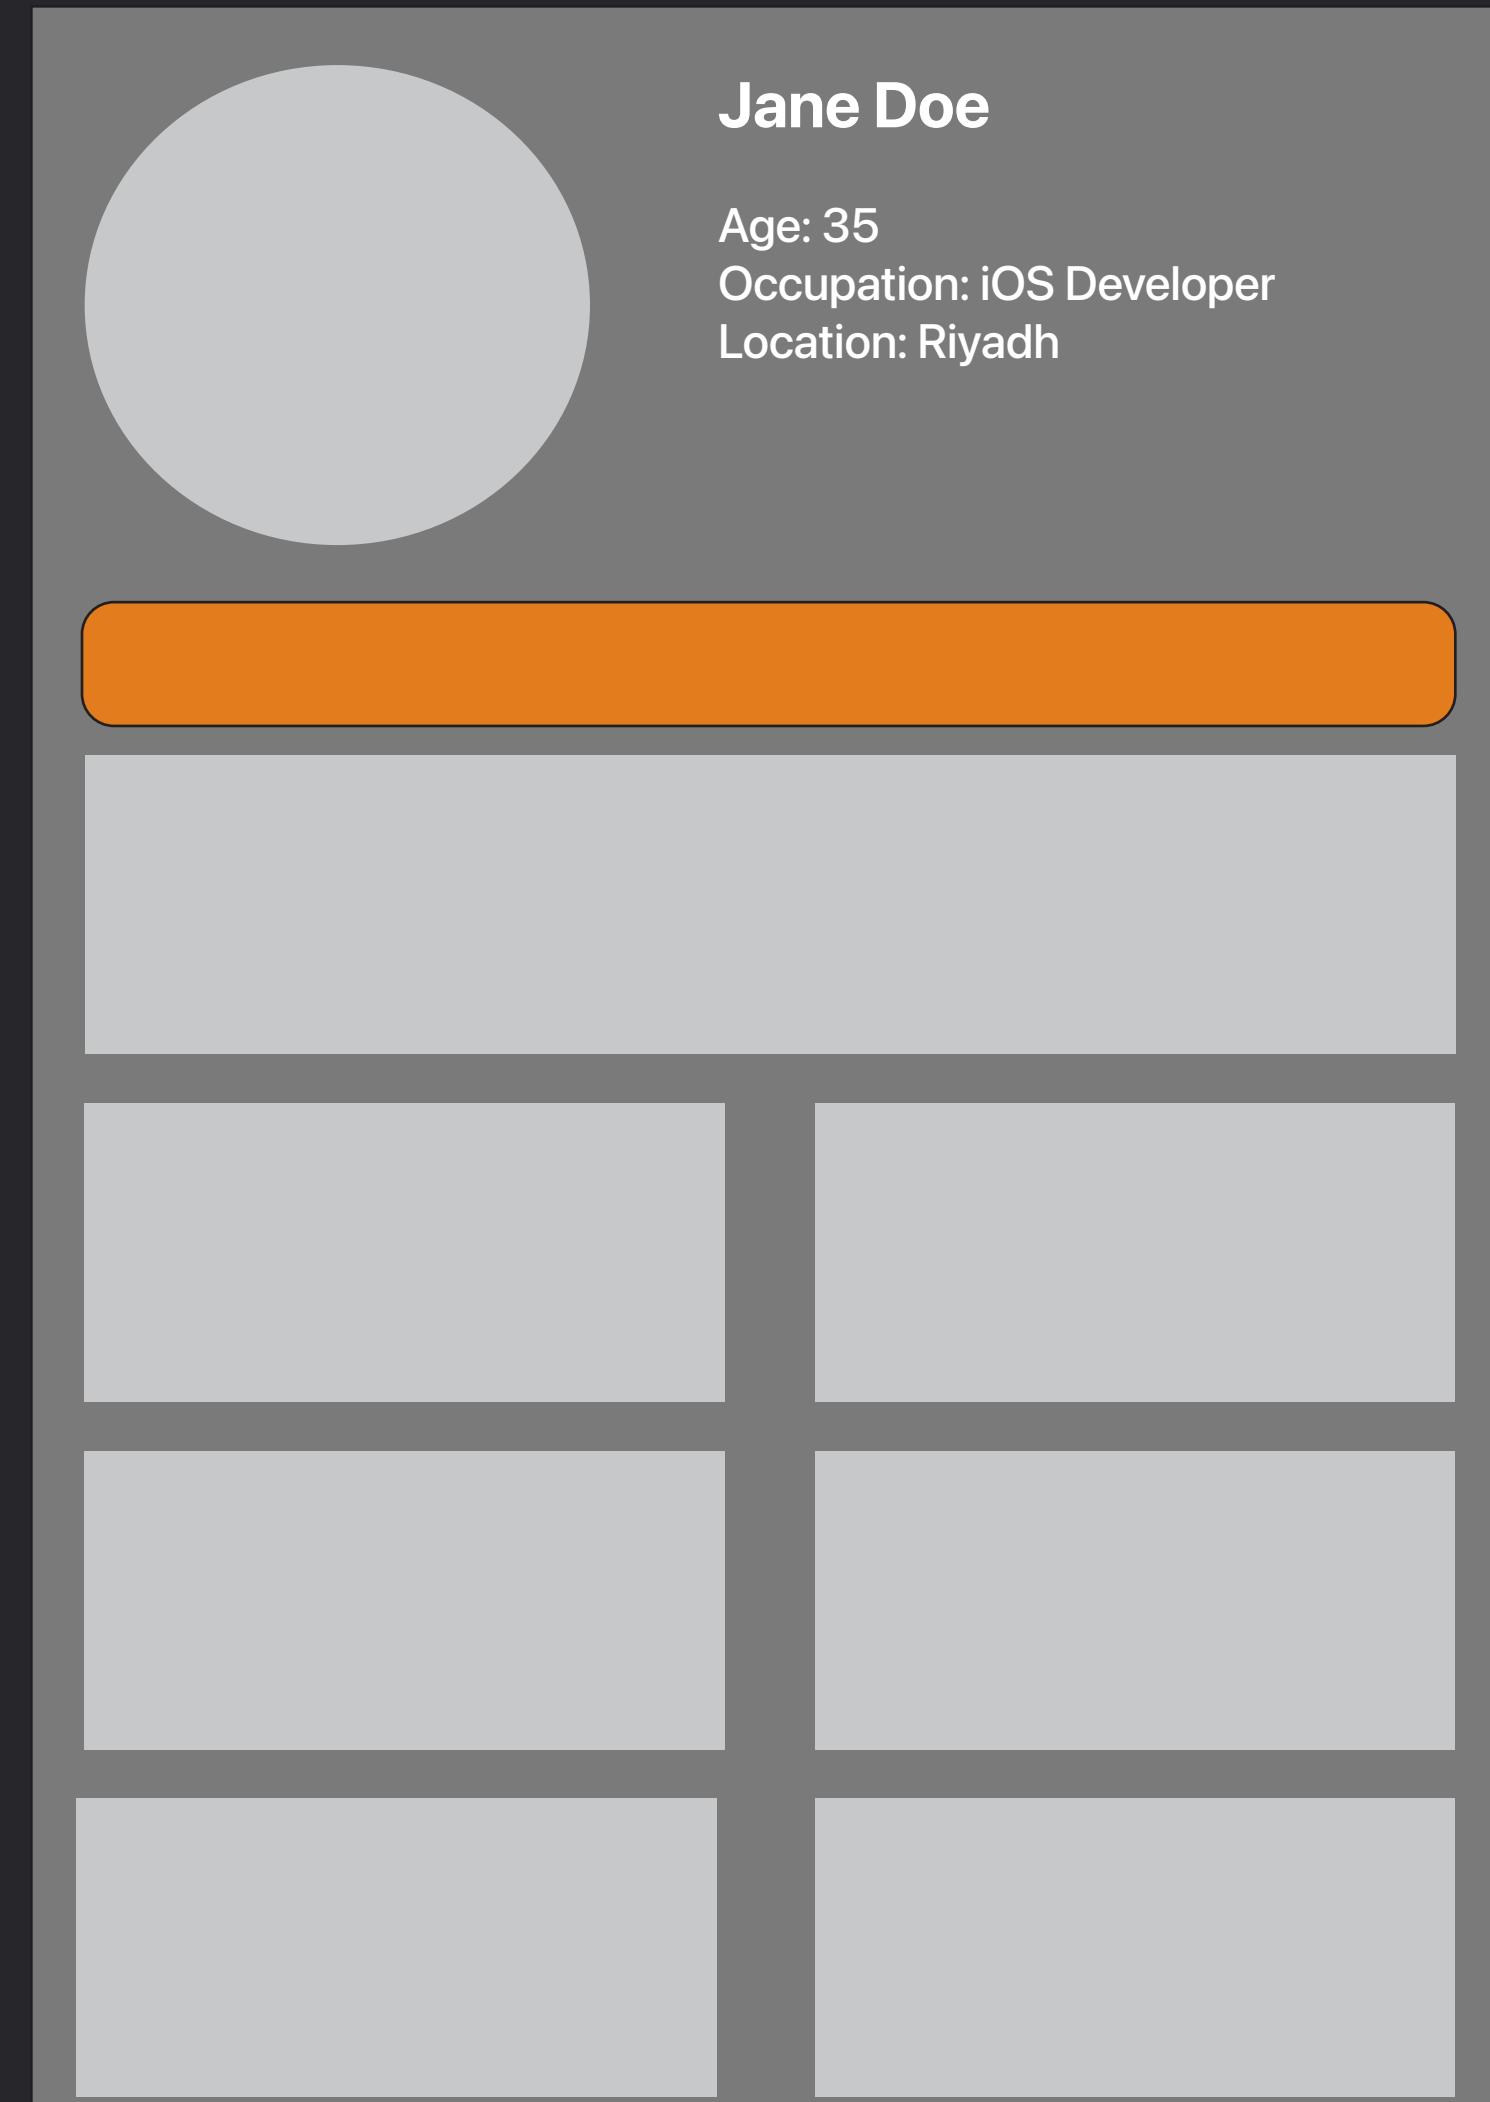

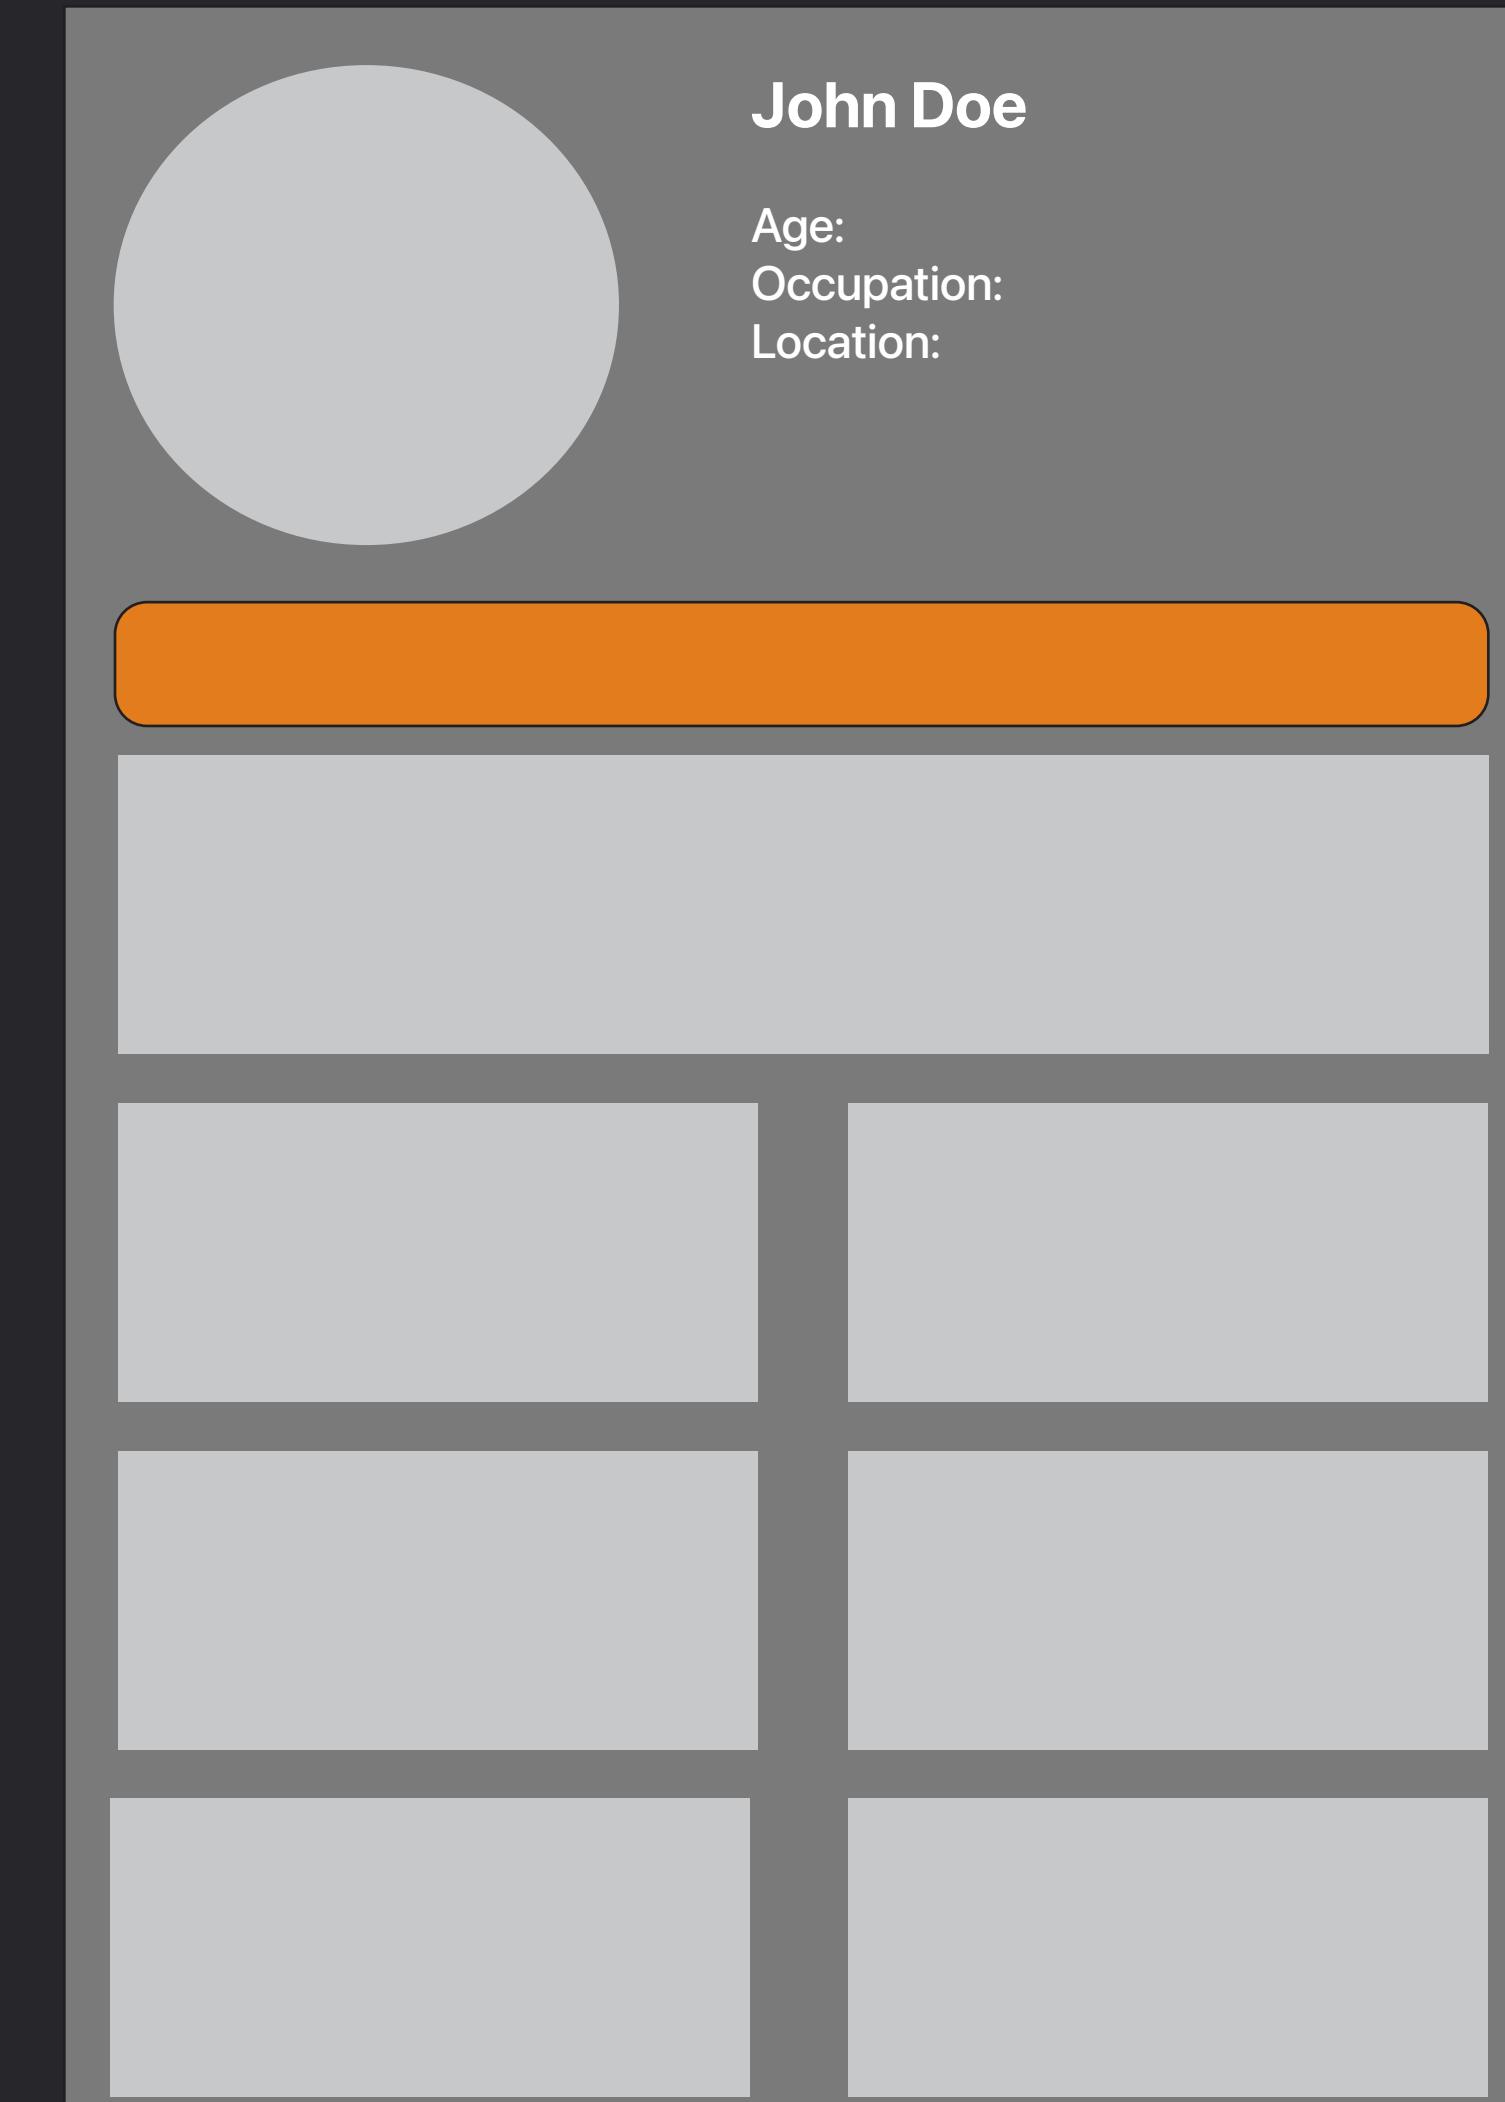

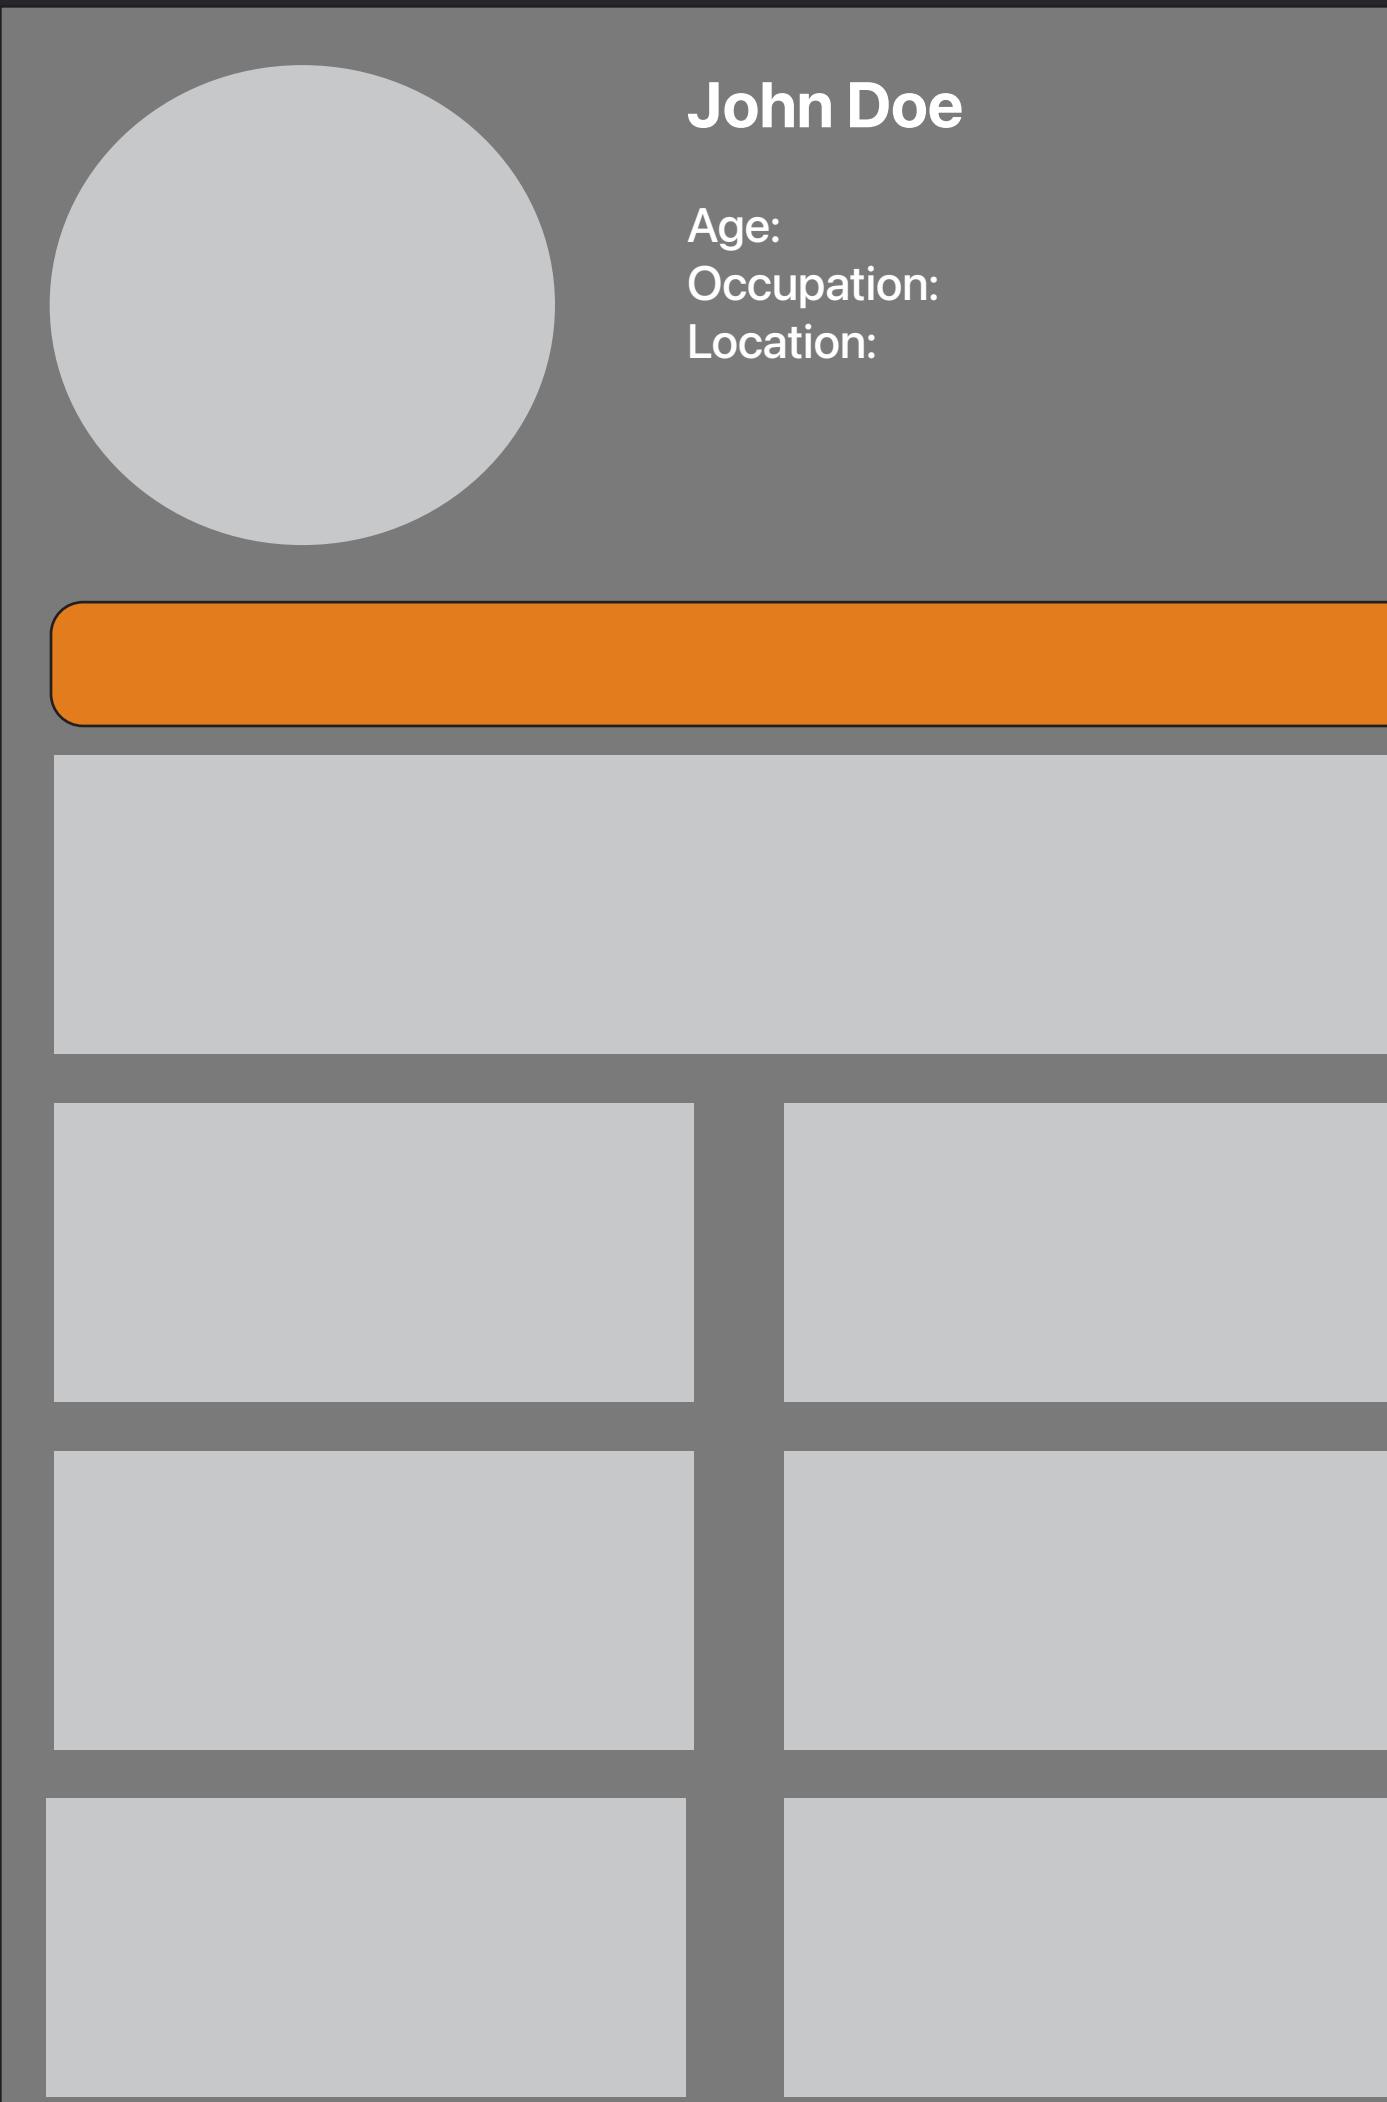

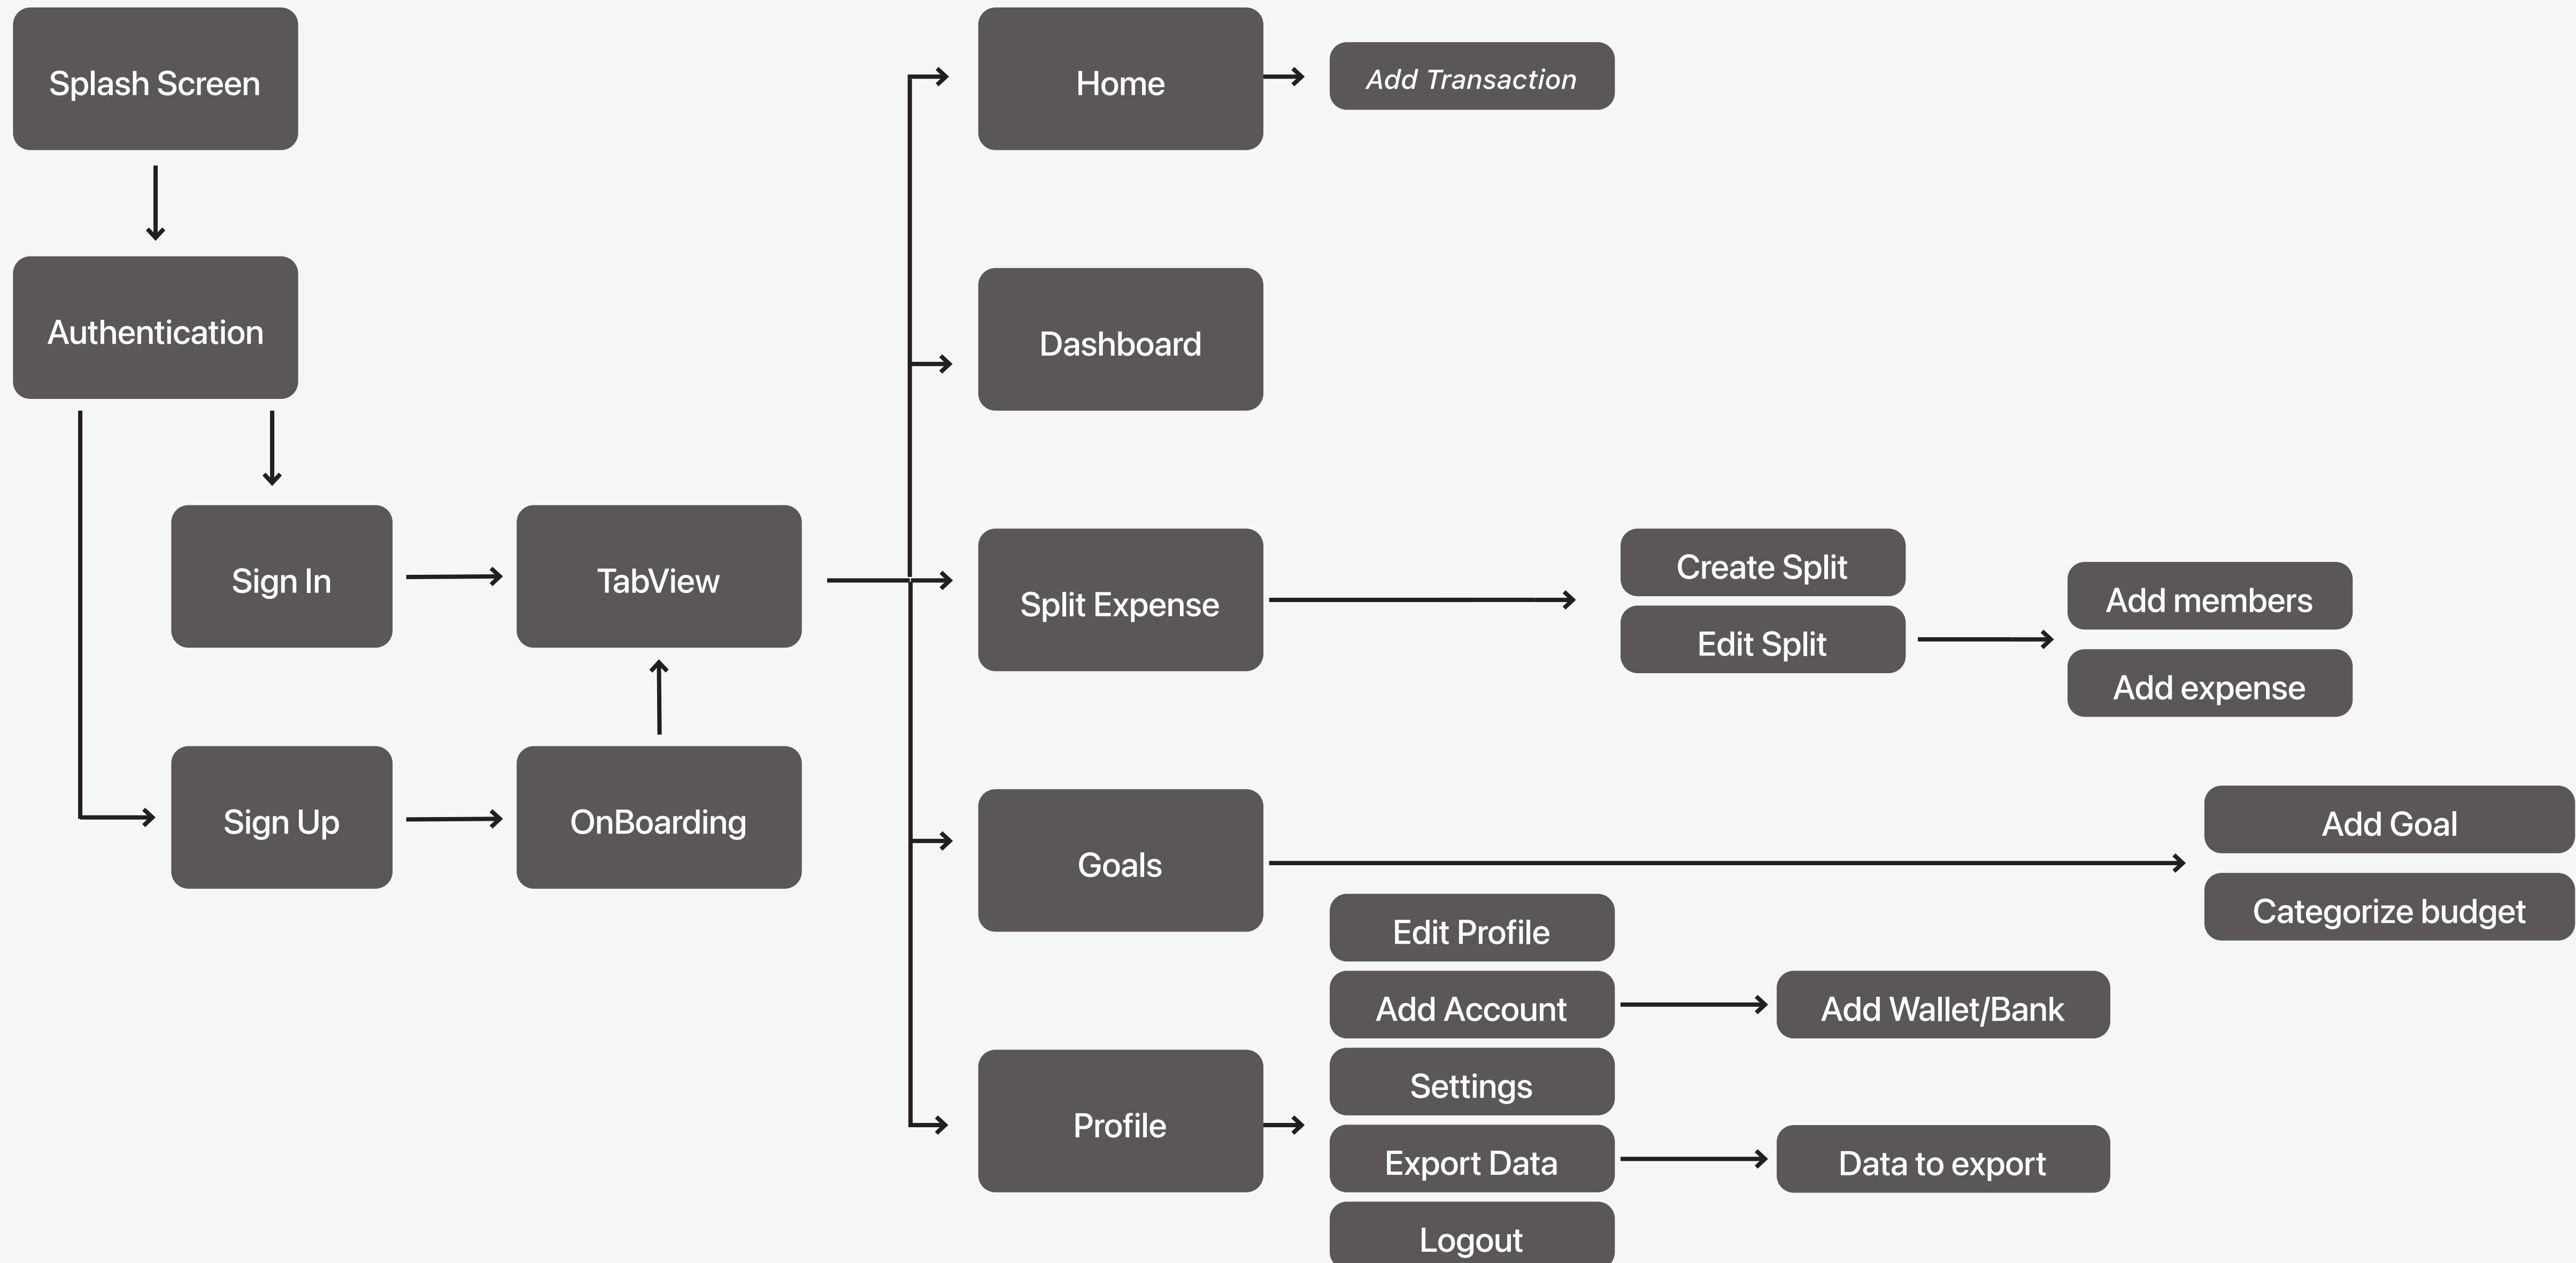

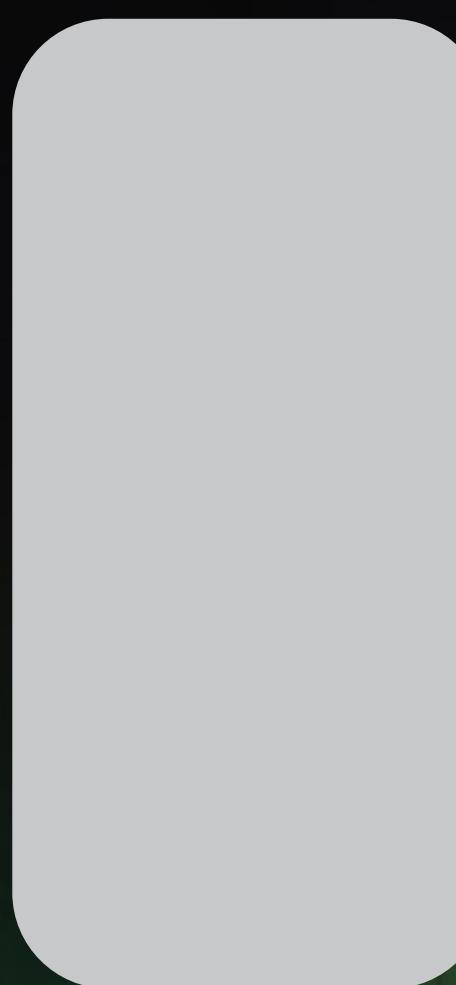

Competitors Analysis

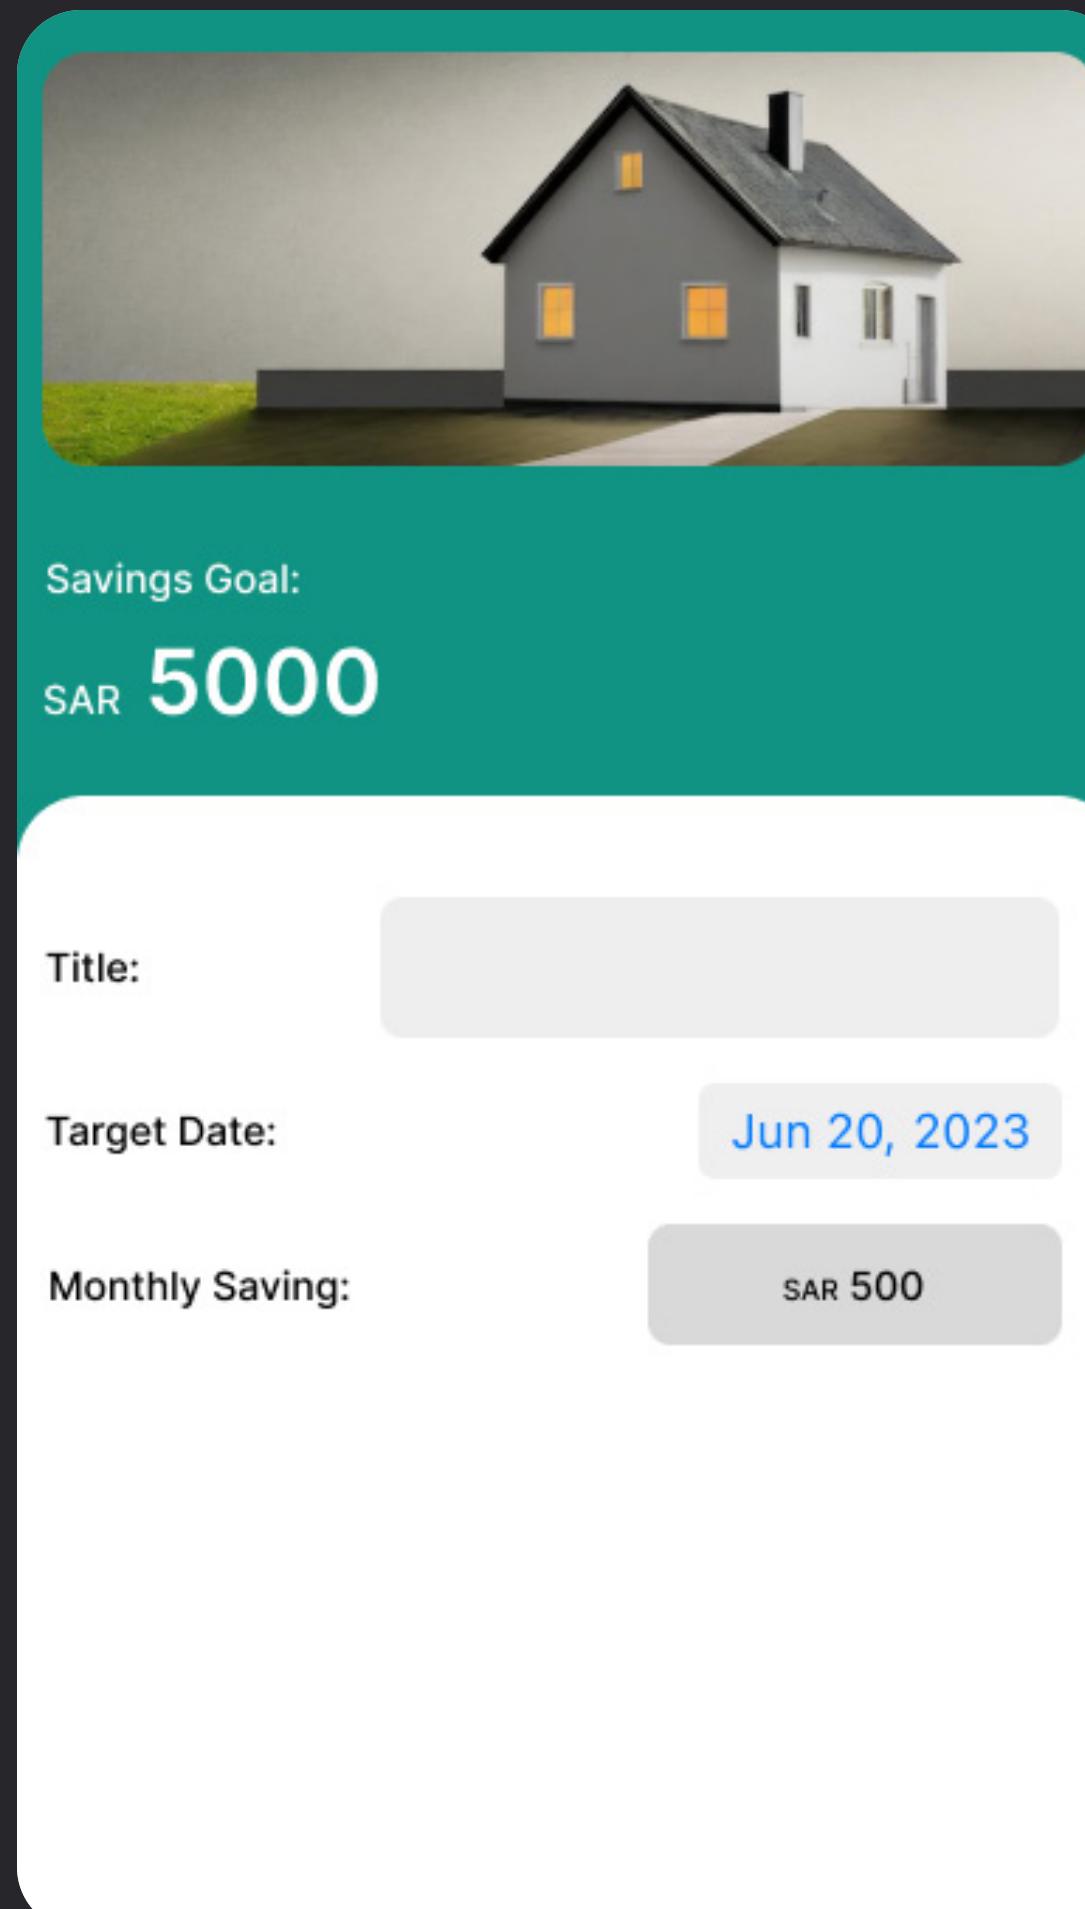

Understanding the competitive landscape is a key component of successful UI/UX design. In this design process we research and analyze the strengths and weaknesses of competitors products, evaluate user feedback, and develop insights that inform design decisions. By taking a comprehensive approach to competitive analysis, we create designs that stand out and meet user needs in innovative ways.

Future Plans

- Implement an automated mechanism for recording transactions into the app. Either by account linking or by tapping into the text messages of the client device.
- Implement an Artificial Intelligence mechanism to forecast spending habits related to specific timelines, events, and other factors.
- Implement customizable alerts and notifications based on user preferences.

THANK YOU
